A GATHERING PLACE FOR THE FAMILY: DINING TABLES WITH THAT SPECIAL SOMETHING

The dining table is the communication hub of the home, a meeting place for family and friends, and for many people the most important piece of furniture in their home. This makes it all the more important that it not only looks good, but also impresses with its quality, durability and sustainability. Austrian natural wood furniture manufacturer TEAM 7 stands for perfect craftsmanship, timeless aesthetics and the use of fine woods from sustainable forestry. With a large selection of dining tables that blend harmoniously into any architecture and interior design style, TEAM 7 sets standards in terms of naturalness and home decor. And when guests come? Thanks to sophisticated technology, the extendable tables can be transformed into a generous dining table in no time at all – individual, flexible and naturally beautiful.

magnum table

There is hardly any other piece of furniture that is as multifunctional as the dining table. It is where we sit to eat our meals, read, play games or do our online banking. It is the centrepiece of all family celebrations, from Easter brunch to birthday coffee parties and Christmas dinners. In short, the dining table is the hub of the home. When choosing one, you should therefore focus not on short-lived trends, but on your own needs: a table that suits the style of the house as well as the lives of its inhabitants.

The highest level of craftsmanship

TEAM 7 manufactures dining tables for people who appreciate something special. With the highest standards in design, materials and workmanship, the Austrian manufacturer combines traditional craftsmanship with state-of-the-art production technology – creating genuine collector's items of timeless beauty that will last for generations. Only fine woods such as walnut, oak and beech are used, sourced from sustainably managed forests and lending each table a distinctive character with their unique grain.

The right table for every home

TEAM 7 offers a wide variety of models to find the right table for every home. Thanks to numerous configuration options, the type of wood, dimensions and features can be flexibly adapted to personal requirements. Whether you prefer a classic four-legged table, variants with striking wooden side panels or delicate metal runners – the range extends from organic shapes with gentle tree edges to clear, linear designs. The result is dining tables that are not only functional, but also express style, personality and the highest standards of interior design.

Room for everyone

Extendable tables are the chameleons of dining tables, offering flexible options for saving space or accommodating spontaneous guests in everyday life. TEAM 7 demonstrates how sophisticated and comfortable this technology can be: instead of cumbersome pulling, wobbly tops or annoying table legs, the extendable tables from the natural wood specialist impress with precisely integrated extensions that are elegantly concealed inside. The mechanisms remain invisible, but the function is impressive – the table surface can be extended in a few intuitive steps. It's almost like magic and makes spontaneous hospitality possible without any fuss.

Aesthetics and function in harmony

TEAM 7 remains true to its high standards of design and materials: even when extended, the tables appear to be made from a single piece. An impressive example is the classic tak table, where the grain runs seamlessly across the entire surface, even with the extension leaf – a detail that not only demonstrates exceptional material expertise but also meets the highest aesthetic standards. This is how TEAM 7's extendable tables become true masterpieces that combine everyday practicality with exclusive interior design.

Comfortable handling

Different types of extension mechanisms are designed to suit the specific room layout and personal requirements. For example, is there a carpet under the table and how are the chairs arranged? With some models, only the tabletop extends to both sides, while the runners or legs remain in place. Other models also change the position of the legs so that they remain on the outside of the table even when extended, creating a harmonious overall look. All extendable tables feature precise, partly patented technology and cushioned insert panels that allow the table to be extended silently and effortlessly.

taso table

Whether extensions on one or both sides, with insert panels made of wood, coloured glass or ceramic – TEAM 7 focuses on individuality. The result is a dining table that adapts to any situation, meets all needs and at the same time makes an unmistakable design statement.
