2023

HAVING YOUR OWN PRODUCTION CAPACITY MEANS BEING IN CONTROL OF QUALITY AND SECURING YOUR INDEPENDENCE.

## IT'S IN OUR OWN HANDS

At TEAM 7, everything is in our hands: from the forest to the finished furniture. Because overseeing the entire supply chain is the only way that we can truly guarantee premium quality, sustainable production and independence. The past few years have revealed the weaknesses in international supply chains and demonstrated the strengths of local manufacturing. It all begins at our timber yard, where the premium hardwood that we use in our furniture is given time to mature. This is the starting point for the unique solid wood furniture that we have been making in batch sizes of one in our own plants in Austria for decades now. As a pioneer for sustainable living, today we are benefiting from this experience and from our high degree of in-house production, which guarantees our flexibility and supply reliability – particularly in these challenging times.

Just like a tree, we draw strength from our roots. And we stay true to them. The new TEAM 7 Welt is currently emerging at our headquarters in Ried im Innkreis in Upper Austria. As a place of innovation and inspiration, it is turning our sustainable philosophy into something tangible and setting new standards in green building. At the same time, we are working consistently to realise our vision for the most efficient and environmentally sustainable manufacturing facility for solid wood furniture ever conceived – the green plant. In total, we are investing some EUR 40 million in our Austrian sites so that we will be able to continue satisfying individual customers' wishes perfectly and inspiring people all over the world to embrace a sustainable lifestyle.

You can also feel this passion running through our new products for 2023. They reflect the expert way in which we combine genuine solid wood, traditional craftsmanship and state-of-the-art technology. Perfect examples of this are our new round **miró** dining table with its numerous lovingly created details and the new **kids** furniture range with its versatile children's furniture made of genuine solid wood. Take a look for yourself.

Dr Georg Emprechtinger,  
CEO, owner

# miró

Inspired by works by the Catalan painter Joan Miró, the shape of the **miró** table is reminiscent of a futuristic, seemingly weightless object that floats in space. As usual with TEAM 7, **miró** – which reflects the love of craftsmanship in many details – is made entirely of solid wood. Its round table top makes the **miró** table a particularly communicative place that will enrich small city apartments just as much as spacious dining rooms. At the same time, its sophisticated technology ensures greater convenience, whether you go for the extendable or non-extendable table.

## A TRULY GREAT PRODUCT, EVEN IN ITS SMALL FORMATS

As a non-extendable table, **miró** comes in a broad range of sizes and wood types – from ultra-compact, with a diameter of 90 cm, all the way to an impressive 160 cm diameter, which can accommodate a large gathering. Solid-wood legs give the **miró** table its strong base. They meet the floor at the outline of the table top and are slightly recessed as they move upwards, finally melding with the inwardly bevelled table frame into a single form with the aid of precise notches and high-quality, highly detailed craftsmanship.

fig. left: **miró** non-extendable table, d 160 cm, wood type walnut, basalt black ceramic

“

*The pure beauty of solid wood combined with the details of artistic craftsmanship to create a spectacular aesthetic. **miró** is carved from the wood on which sophisticated saucers fly:*

Sebastian Desch, designer

## THIS TABLE WILL TURN YOUR HEAD!

In the table diameters of 130 and 160 cm, the non-extendable **miró** table is optionally available with a turntable that can be flush-fitted into the table top. Like the table top itself, this can be made of solid wood, coloured glass or ceramic. Four ball-bearing-mounted, three-dimensionally adjustable castors provide smooth running and perfectly coordinated rotary action, even on uneven floors. The turntable can be removed for easy cleaning. Intricately crafted solid wood elements are used to make the table frame behind which the barely visible technology is concealed with style.

CAN BE INDIVIDUALLY TAILORED

EASY TO EXTEND

#### GET MORE SPACE IN NEXT TO NO TIME

As an extendable table, **miró** comes in a diameter of 110 cm with a 50 cm table insert and in diameters of 120 and 130 cm with a 60 cm table insert. The innovative extension technology has been reduced to a minimum height and is integrated almost invisibly into the table behind the table frame that has become synonymous with **miró**. This makes it possible to sit comfortably with maximum legroom. The bidirectional, soft-close swivel technology makes it easy to open and close the integrated table inserts quietly and provides additional comfort and safety.

#### SOPHISTICATED DESIGN

Positioned close to the edge of the table, the legs guarantee maximum legroom and make sure that everyone can sit comfortably around it, whether it's closed or extended. The love of detail that has gone into this new product is also reflected in the design of the table legs, where the interplay between angular and rounded lines echoes the stylistic elements of the table top.

#### GENUINE NATURAL MATERIALS

You decide what goes under the table top. As well as pure solid wood, when it comes to the table inserts for the **miró** table you can also choose from our wide range of coloured glass and ceramic options, which has now gained an exciting new addition: iron grey ceramic.

fig. above: **miró** extendable table, d 120 + 60 cm, wood type oak white oil, natural white matt glass | **girado** chair, wood type oak white oil, matt black swivel base, fabric Canvas 264 | **cubus** glass cabinet, wood type oak white oil, clear glass

#### LOVE OF DETAIL

**miró** extendable table

One nifty detail in the extension technology is a hinged filler panel on the table inserts that keeps the pull-out rails hidden when the table is extended and ensures a consistent look that is virtually indistinguishable from that of its non-extendable counterpart. A mechanical locking element ensures maximum stability and securely closed tabletop joints. High-quality castors integrated into the legs protect the floor and make the extendable table easier to use.

“

*It's fascinating when organic contouring can be executed with classic, solid wood – in a way that is tailored to the material!*

Martin Ballendat, designer

## ARTISTIC

**girado** chair

The artfully curved solid wood backrest of the **girado** chair supports the upper body and makes it easier to adopt a comfortable sitting position, while the high-quality upholstery with innovative internal elastic straps ensures maximum seating comfort despite the slimline look. Tapered towards the front, the seat itself amplifies the overall dynamic appearance and boasts genuine upholstery craftsmanship with precise piping all round the curve of the backrest. The upholstery is available in all TEAM 7 fabric and leather colours. All components of the **girado** chair can be individually replaced to ensure a sustainably long life. Ideal for your home office: the **girado**, a truly stylish office swivel chair.

fig. above centre: **girado** chair, wood type walnut, matt black swivel base, black leather

fig. above right: **girado** office swivel chair, wood type walnut, matt black swivel base with castors, black leather

## HIGH-IMPACT

**cubus** display case

With its 39-millimetre-thick top board and consistent wood-grain pattern on the fronts, this **cubus** display case highlights the power and beauty of solid wood. The fine black aluminium frame fronts, available with clear or smoked glass, provide a fantastic contrast. LED strips and LED spotlights that can be individually controlled and dimmed are fitted on the centre panel, providing the perfect stage for your favourite pieces inside.

fig. right: **cubus** display case 21, wood type oak white oil, clear glass

## LOVINGLY CRAFTED

**filigno** sideboard

The delicate casing made from genuine solid wood, the filigree metal frame base and the glass element extending around the corner lend the **filigno** sideboard elegance and lightness. Black shelf supports that match the aluminium frame doors and concealed door hinges underline our love of detail.

fig. left: **filigno** sideboard 22, wood type walnut, smoked glass, matt black metal frame base

# lui

All members of the much-loved **lui** family of chairs share the same characteristically casual look: a smoothly stretched exterior and distinctive crumpled folds on the inside. The seat shell fits snugly around the shape of your body and guarantees outstanding seating comfort, which you can now enjoy to the full at the bar as well. At 67 cm tall, the new **lui** bar chair bridges the gap between kitchen and dining area in charming fashion and, together with the rest of the **lui** family of chairs, allows a consistent look to be maintained when planning different living areas.

fig. above: **lui** bar chair, wire frame with stainless steel finish, fabric Clara 188

fig. right: **lui** bar chair, matt black wire frame, leather L1 medium grey

*It was just a matter of time until the casual **lui** made it to the bar. The visual angle in the chair base and its bold shape are the result of careful thought. Cheers!*

Jacob Strobel, designer

## HIGHER

**lui** bar chair

The elegant wire frame, available with a stainless steel finish, in glossy chrome or matt black, is inspired in its look by the dining chair. Thanks to the artful contouring, the foot rest becomes part of the frame and its clever height offers additional comfort while sitting.

## LOWER

**lui léger** chair

The armrests of the new **lui léger** are slightly lower than on our **grand lui** but are still extremely comfortable. Their height is designed so that your arms can be supported comfortably on the armrests for relaxed sitting. At the same time, **lui léger** can easily slide under the table, thanks to the reduced height of its forward-sloping armrests. This offers more freedom when planning smaller rooms or dining areas with less space to play with. The recessed front edge of the armrests is another deliberate design detail that provides exciting visual differences and gives **lui léger** its distinctive character within the **lui** family of chairs.

fig. right: **lui léger** chair, matt black wire frame, inside fabric Canvas 424, outside leather L1 black

THIS CHAIR SHOWS YOU HOW DESIGN AND COMFORT DON'T HAVE TO BE MUTUALLY EXCLUSIVE.

*- it's a tree story.*

## Kids

### Rent me, baby!

Save money and, above all, precious resources. This is because our rental service gives you the option of using the baby bed for only as long as you actually need it. Then you simply give it back. You can find more details about our baby bed rental service from selected TEAM 7 partners in your area:

[qr.team7-home.com/cradle-renting](http://qr.team7-home.com/cradle-renting)

### baby bed and wall module

The minimalist frame and the special knitted fabric that runs all round the baby bed make it lightweight and mobile – a sheltered nest for dreams on wheels. The wall module performs not one but two jobs: after it's served its time as a changing station, it's perfect as a small but handy workstation.

Children are especially important to us, and we know how important a natural environment is for them to grow up healthily. Our solid wood kids furniture from the new **kids** range lets you create just that in your own home. Besides maximum quality for safety and a long lifespan, we also guarantee sustainable production. Ultimately, we want to leave more than just high-quality furniture to our children: we want them to have a world worth living in.

### wardrobe, shelves and alcove

Based on a shared element system, the wardrobe and shelves can be perfectly combined with each other, turning planning into child's play. The upholstered alcove is the perfect retreat to rest and read. Surrounded by pure solid wood, this space radiates a special feeling of warmth and security. The LED lighting creates a pleasant lighting atmosphere.

# YOUR CHILD GROWS AND GROWS?

## SO DOES OUR FURNITURE.

### bed

From a single bed to a den bed, loft bed or bunk bed and back again: with TEAM 7 **kids**, it's child's play. Clever add-ons make the **kids** bed fantastically versatile. An optional platform for the single bed or the bunk bed can be designed for any or all four sides of the bed, as you wish. This also provides valuable storage space in large drawers and handy storage surfaces – turning the bed itself into a play area. An integrated safety rail offers protection when things get wild.

### desk, pedestal and swivel chair

The TEAM 7 **kids** desk is height-adjustable and can be adapted to your child's ergonomic needs. Integrated cable management, a drawer and a partially tiltable table top are available as options for additional comfort. Our desk pedestal comes in two different widths depending on how much storage space is needed. With its adjustable seat height, seat depth and backrest, the swivel chair guarantees unbeatable seating comfort. The upholstery is available in all the colours of our Ripley fabric range.

## NEW WALL PANELS

Our **cubus**, **cubus pure** and **filigno** wall units combine handy storage space with timeless design to make a single perfect whole that offers virtually unlimited planning options. Our new wall panels will now give you even more creative freedom! Choose between solid wood panels with a vertical or horizontal grain. Cabinets, design elements, shelves and the TV mounting plate can all be positioned freely. The necessary cabling can run easily and invisibly behind the wall panels, while the optional LED lighting lets you create a real highlight in your living room.

## COMFORTABLE

### **filigno** coffee table

As a stylish companion to your sofa that also gives you some useful storage space, our coffee tables will add the finishing touch to your living room. For more comfort, two models are also now available in a new, higher version: choose between 34.5 and 42 cm for the **filigno** coffee table and between 28.3 and 39.5 cm for the **c3** coffee table.

fig. right: **filigno** coffee table, wood type oak, light grey matt glass, stone grey frame

## FLEXIBLE

### **cubus pure** wall unit

This modular **cubus pure** wall unit demonstrates just how versatile and flexible our living room ranges are. Whether you go for one or two vertical units, with design element or without, the planning for your wall units can be customised to your size and storage space requirements, and their look will never be anything other than captivating. A "stage" for the individual elements of the wall unit is provided by the new wall panels and a 39-millimetre-thick solid wood panel that will hold its shape thanks to its three-layer technology. The brackets vanish behind the panels with the aid of sophisticated technology.

# kitchen

## NEW PLANNING INGREDIENTS

### VISIBILITY

Black aluminium frame doors with clear glass or smoked glass add new options for designing our solid wood kitchens. The door hinges are sized so as to be countersunk invisibly into the wooden element and concealed by the aluminium frame. The stylish corner display case offers you stimulating planning inspiration for finishing off your kitchen unit. A vertical wood-grain pattern for the wooden fronts of your **linee** kitchen is another new option.

fig. below: **linee** kitchen, wood type walnut, black matt glass, smoked glass  
lui bar chair, matt black wire frame, leather L1 black

### BEAUTY

The new three-dimensionally adjustable flap hinge on aluminium frame fronts for upper cabinets also underscores the stringent requirements made of our solid wood kitchens. To ensure a perfect appearance, the technology is concealed in the side of the cabinet, requiring the highest precision and enormous expertise in solid wood working. The superior cushioning mechanism ensures comfortable handling when opening and closing the flap door. The combination of black aluminium frame doors and the new black lighting profiles opens up some great possibilities for creating fascinating accents in our solid wood kitchens.

Nifty storage space is also provided by slender bottom cabinets with our new functional pull-out including a holder for baking trays and chopping boards.

fig. left: top cabinet with aluminium frame and smoked glass, bottom cabinet with functional pull-out, wood type oak white oil

### CLARITY

The new dual pull-out with significantly larger shelves ensures a maximum overview and more storage space in our tall cabinets. In the upper section, the contents are divided between the door shelves and the pull-out. Because the sides of the shelves are low the supplies can also still be easily reached. Large storage items can be placed on the generous shelves in the lower section. The flush-fitted strip handle is now available in a black stainless steel finish alongside its standard stainless steel finish, thus opening up even more design possibilities.
