

## *natural surface*

### TEAM 7 natural oil

Gives surfaces a waxy, silken matt character and a distinctively appealing texture.

Soy oil adds a unique richness to the surface of the wood. Added beeswax is responsible for the silken matt character typical of TEAM 7 surfaces. A perfectly adjusted combination of oils and wax ensures ideal absorption by wooden surfaces, and optimal protection even for heavily used surfaces such as table tops.

### *principal ingredients of TEAM 7 natural oil*

**linseed oil**

from flax seeds

**soy oil**

oil from soybeans

**beeswax**

secreted by honeybees

### advantages of TEAM 7 surfaces

**simple care and repair**

Even small dents and scratches can be easily treated.

**unique texture**

You can enjoy the surface texture of real wood. Not varnish.

**open wood pores**

Treatment with natural oil allows the wood surface to remain open-pored and breathable.

**healthy air quality**

Open-pored wood helps to regulate humidity in your rooms. It can absorb and release moisture as needed.

**anti-static effect**

This reduces household dust.

**anti-bacterial effect**

absorbs odours

### TEAM 7 natural white oil

Special white pigments in the natural oil create a significantly lighter finish for wooden surfaces.

The addition of white pigments gives the surface of the wood a noticeably lighter appearance. Sunflower oil ensures maximum colour stability and soy oil provides a unique richness. A carefully adjusted combination of the different oils allows TEAM 7 natural white oil to penetrate deep into the pores of the wood, which also ensures optimal protection for heavily used wood surfaces.

### *principal ingredients of TEAM 7 natural white oil*

**linseed oil**

from flax seeds

**soy oil**

oil from soybeans

**sunflower oil**

oil from sunflower seeds

**white pigments**

titanium dioxide

All our natural oils meet the strict requirements of the Austrian ecolabel.

All our natural oils are of a standard suitable for children's toys according to EN 71-3.
