## EVERYTHING MADE TO MEASURE: KITCHEN PLANNING AT TEAM 7

TEAM 7 designs flowing transitions and holistic living concepts with harmonious materials, functional sophistication and millimetre-precise adjustments. To achieve this, every detail is precisely coordinated. All kitchens are individually planned and custom-made to meet personal requirements and spatial characteristics: from simple kitchen units to complex eat-in kitchens with kitchen islands, from handcrafted country kitchens to purist designer kitchens.

k7 kitchen

Today, kitchens are no longer purely functional workspaces which are used exclusively for cooking. Instead, they are the hub of social life, the place where everyone comes together, exchanges ideas and spends time together. Contemporary kitchen architecture therefore requires a carefully thought-out planning concept that meets both functional and aesthetic expectations. Only when all components complement each other perfectly can kitchens be created that not only inspire visually, but also enrich everyday life and social life.

### Every kitchen is unique and made to measure

Your own wishes and requirements should therefore be taken into account as early as the planning phase. At TEAM 7, every natural wood kitchen is an individually planned, custom-made one-off: whether it's a simple kitchen unit, a large eat-in kitchen or a complete room concept with connections to other living areas - in the TEAM 7 stores,

every project is developed and supported by experienced interior designers and interior planners, from personal consultation and professional 3D simulation to reliable delivery and installation.

## **Cross-room living concepts**

Flowing, open transitions from the kitchen to the living areas are one of the core competencies of the manufacturer from Upper Austria: counters, extension tables, kitchen islands, display cabinets, sideboards and variable shelving systems connect the kitchen with the adjoining living area in an elegant and stylish way. The consistent use of the same type of wood - light oak or fine walnut, for example - creates a room-spanning, holistic interior design that is further emphasized by the recurring shapes and structures of the furniture. Materials such as ceramics and colored glass, metal or natural stone set additional accents here and create exciting contrasts to the warm, cozy wooden surfaces with their vivid grain patterns. Matching lighting and textile elements round off the overall aesthetic. The individual details are designed precisely according to the customer's wishes and consistently harmonized with the existing architectural features.

## **Comprehensive planning freedom**

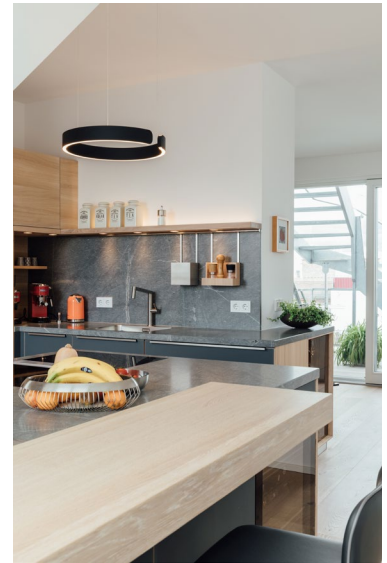

TEAM 7 also offers comprehensive planning freedom for individual kitchen architectures: ergonomics, layout and the exact distances between the individual cooking areas, room situation, space requirements and equipment can be optimally coordinated. Flexible height, width and depth reductions allow millimeter-precise adjustments, and custom-made products can also be implemented at any time. The customized interior fittings of the cabinets and furniture also guarantee the desired order and overview. Together with pull-out shelves, functional cupboard inserts and optional connections for electrical appliances, this makes kitchen work much easier.

## **Unique wood expertise**

In order to be able to offer this special depth of production and comprehensive planning freedom, it is crucial for TEAM 7 to have the entire value chain in its own hands: from the tree to the sawn timber to the panel production to the finished kitchen. Each piece of furniture is manufactured by highly qualified specialists who combine traditional craftsmanship with modern engineering skills, always supported by high-tech production processes. Thanks to its unique wood expertise, TEAM 7 succeeds in translating the multifaceted aesthetics of wood into ever new, appealing shapes - sometimes delicate, sometimes with an accentuated material thickness. This also applies to the kitchens made of natural wood: the handleless pur kitchen, for example, consistently continues the idea of clear kitchen architecture. The finely crafted recessed handles of the newly developed carcass system allow hinged doors, drawers and pull-outs to be opened smoothly. With innovations such as this, TEAM 7 underlines its high standard of creating complex interior designs that combine natural aesthetics and modern design.

Thanks to TEAM 7's unique wood expertise, walnut fronts with a continuous grain of up to 4 metres are possible.

TEAM 7 creates the right kitchen for every room requirement
