

## PRESS RELEASE

### *Proper Care for Natural Stone Surfaces*

Granite, marble, slate – stone is a product made by nature. Surfaces made from natural stone appear to be robust. However, they need regular care in order to preserve their high-quality look for a long period of time. All marble surfaces by TEAM 7 receive a base impregnation at the factory that prevents dirt from entering the stone where it can form permanent residues. From time to time, this impregnation should be refreshed. For this purpose TEAM 7 offers a care set for all polished and open-pored stone surfaces which ensures durability and smoothness. It contains cleaning sponges with which even dried-up stains such as food debris or limescale deposits can be removed as well as an impregnation spray that not only protects the stone but also intensifies its structure and colours. With this, natural stone surfaces will still look new even after a long time.
