

cubus, cubus pure and filigno living

cubus

TEAM 7 signature details such as mortice-and-tenon joints in the frame and plinth, finger-jointed drawers and hand-picked solid wood fronts highlight the superb craftsmanship of the entire **cubus** range. Wooden top panels with a thickness of 25 or 39 mm accentuate the solid construction of **cubus**. A glass top can also be selected as an option.

cubus pure

The key design feature of the **cubus pure** living range is the delicate coloured glass that wraps around the fronts like a frame. The fine glass edges and recessed plinth create a light, floating appearance. The glass sides can be replaced easily, thanks to our specially developed, patented attachment adapters.

filigno

The **filigno** living range is strikingly neat and structured. Central to this design is our passionate and consistent devotion to wood as a material, and the use of our 12 mm three-layer board. With refinement, elegance and modernity, **filigno** offers scope for various design styles, from sleek and elegant to versatile and young.

TEAM7

filigno console

Home entertainment systems are getting ever smaller, reducing the need for the traditional storage space in wall units. The **filigno** console picks up on this trend. At just 12.4 cm in height, it is pared back to the essentials, resulting in a neat, contemporary aesthetic.

top: solid wood (1.2 cm), up to 320 cm continuous length possible

front: solid wood, coloured glass, ceramic

glass colours: see material overview

ceramic colours: see material overview

handles: soft-touch, wooden handle (only for wood front)

design elements

The design elements are open units made of pure solid wood, which integrate perfectly into the TEAM 7 element system. Whether as a free-standing or suspended solo piece, or combined with or flush-fitted in sideboards, dressers, wall units, and kitchens, the design elements offer space to present decorative accessories – similar to a display case. The display cabinet look of the design elements can be reinforced with the optional all-glass doors. These hinged doors are available in clear glass, smoked glass, satin glass or palladium. The back panel of the design elements is available in a choice of coloured glass or solid wood.

TEAM 7

design elements with aluminium frame door

Additional planning options for design elements come in the form of black aluminium frame doors with clear glass or smoked glass. These can also be designed to go around the corner and combined with a glass side. The door hinges are sized in such a way that they are countersunk into the wooden element and concealed by the aluminium frame. This results in a very high-quality and elegant look.

graphic design element

The solid wood design element **graphic** can be used as a solo piece, wall unit, or as a room divider. Its fixed shelves and uprights are arranged in a visually interesting and attractively balanced layout, allowing a wide range of options for use. **graphic** is available in two widths, with wood or glass back panels or with no back panels at all. The interior partitioning is fixed in at the factory, and is available in either left- or right-handed versions.

colour patterns

Wood is one of the most noble, beautiful and versatile natural products we have. Every piece of wood is unique. Differences in colour are a result of the wood's structure and place of origin. Similarly, the age of the piece of furniture will determine its colour, as natural factors in your home's environment (e.g. sunlight) can change the surface colour. When your order specifies a particular colour, we do our best to match it. But minor variations in wood, leather, fabric, glass and ceramic are inevitable. An exact colour match will never be possible.

*wild wood versions only available on fronts and table tops

**venetian oak is only available on fronts
